

COUNSELING SERVICES

Counseling services are available to all Cerritos College students. Counseling services support students in navigating the registration process, planning classes, choosing a major, exploring transfer options, and more. The Counseling Department also offers students support with exploring different careers. See Career Services to find out more information about exploring careers and related majors.

To meet with a counselor, students can choose from in-person or online meetings by appointment or attend express counseling hours. More information can be found at www.cerritos.edu/counseling (<http://www.cerritos.edu/counseling>).
