

COMPUTER AND INFORMATION SCIENCES: PROGRAMMER (A.S.)

ASSOCIATE OF SCIENCE

The CIS Computer Programming degree is designed to provide students with skills in computer programming to enable graduates to gain employment as an entry-level programmer. Courses will emphasize skills on how to organize, code, and test computer programs for variety of applications.

Program Student Learning Outcomes

- Students create a graphical user interface to be used with a computer application.
- Students develop and maintain a database application.
- Students distinguish between the different programming languages.
- Students implement and use a Unix client or server.
- Students use object oriented programming to develop a computer application.
- Students utilize various fundamental database structures.
